Work experience

Foresight-Center
of HSE

november 2025 —
march 2026

B2B

Updated the design of an ineffective database. Proposed solutions that speed up the time of use by up to 2 times, collected UI documentation for 100+ components, and then laid out in html and css for 1000+ lines of code for transfer to development

Educational projects

Activity-FM

september 2025

B2C

Competitive work for the Russian Design Cup. Introduced an effective tool for searching for leisure activities, reminiscent of My Wave

Bimbook —
literature ecosystem

april 2025 —
june 2025

A global project aimed at developing the potential of Voronezh. Developed a design system of components at the atomic levels for the web and application built on blocks of different types of content
